

Informed Consent

My therapist who will carry out the aesthetic treatment has given me all the information with potential benefits, limitations and alternative treatments. I understand fully its embodiment. All my questions and concerns were answered to my satisfaction. I have also read and understood the associated patient brochure.

I am well aware of all contraindications and possible unwanted effects and results. I accept the risks, side effects and possible complications that may occur during this treatment. There may be some bruising, swelling and redness. I understand that the results can not be guaranteed. The duration after the treatment may be shorter or longer than the specified time period.

I answer questions about my medical history by my best ability. I certify that I have been informed about the treatment in agreement with the above and agree with the performance of the treatment.

Before the treatment with V Soft Line®

You must fill in the patient's consent and informed consent. Your practitioner should take pictures before the treatment and save the pictures with the patient records. You should not be treated if you take painkillers the last seven days, take supplements of type Omega 3 in the last week or if you are using blood-thinning medications. You should not treat areas previously treated with permanent fillers or other types of implants. You must not be pregnant or breast-feed. You must be 25 years or older.

After a treatment with V Soft Line®

You should not touch the treated area immediately after the treatment. You can then, if necessary, massage the treated area gently once a day the next three days. Please use a regenerative serum for this. You should not sunbathe in the coming weeks and you should use a sunscreen (minimum factor of 30) in contact with the sun the following 12 months. Avoid saunas and hard training during the first day and avoid even severe cold outdoors. Avoid using make-up and skin cream the first day. Avoid alcohol the first day. You should not be treated with massage, lymphatic drainage, carbon dioxide, erbium lasers, radio waves or other device the weeks after a treatment with V Soft Line®

If you have questions or feel that things heat and pain, you should immediately contact your clinic. Is it urgent and you do not get in touch with your clinic, contact your health center instead or search emergency care in hospital.

Make sure that your therapist add the batch stickers to your log book and document the procedure.
